

Julie Resynth for Thumbjam by Les Productions Zvon

A fun cyborg vocal sample set, half human and half robot!

This pack is based on one-shot samples of the voice of Julie, a Montreal jazz singer. But here the samples are resynthesized to create new ones that are playable chromatically across the keyboard.

In most cases, the actual flavor and tone of Julie's voice are preserved in the resynthesized samples within her natural range and the notes outside of it, even if less realistic, sound good too. In all cases, the original variations (pitch and volume) of the vocal samples are preserved with their natural irregularities.

Of course when resynthesizing, some of the original sound is either lost or transformed and further modifications can be added but for this set I tried to stay the closest that I could to the original most of the time.

This is not a classic vocal library with choirs (for instance none of the samples are looped), nor is it a synthesized/vocoding sample set. It's an hybrid that retains the flavor of Julie's voice while delivering new original sounds suitable for keyboard playing and melodies.

The Thumbjam version is adapted from the regular computer version. The free demo set has 6 instruments. The full version adds 25 for a combined total of 31 instruments and a total size of 51.8 MB. All are multi-sampled.

This is a subset of the Julie Resynth available for various samplers::

The original, not resynthesized, one-shot samples from which it is derived can be used in the Drum Machine. Those interested can find more info and free downloadable demos here:

Installation:

The individual Thumbjam instrument files are included in the larger zip files that you downloaded from our website. You have to unzip the larger file, demo or full version, on your computer first. The demo contains 6 Thumbjam instrument files and the full version 25. These larger zip files also contain this PDF documentation and the zvon_license text file.

Do not unzip the individual Thumbjam instrument files as they have to be imported in Thumbjam as is. Please refer to the Thumbjam documentation for the exact import procedure.

To buyers of the full version: please note that you have to keep the demo instruments installed as they are not duplicated in the full version.

Please visit our iPad and iPhone page for more iOS sounds: http://lesproductionszvon.com/for_iOS.htm

This sample pack can be used royalty-free in any piece of music. The only restriction is that you are not allowed to sell or distribute in any way the presets and samples, even in modified form, without our authorization.

For more details about the license please read the included "zvon_license.txt".
