

Electronic Square Wave Keyboard for Thumbjam by Les Productions Zvon

The hardware electronic keyboard sampled here is a digital square wave instrument. I don't know exactly how old it is but my guess is that it's at least 20 years old. It has 12 chromatic sounds:

01- Piano 02- Saxophone 03- Pipe Organ 04- Guitar 05- Trumpet 06- Violin
07- Harpsichord 08- Jazz Organ 09- Synth 10- Cowbell 11- Oboe 12- Clarinet

There's a vibrato button that has no settings, it's either on or off. I've sampled the sounds with and without vibrato. Additionally, it has a bass and 5 percussion sounds: kick, conga, snare, cymbal and hi-hat. All these do not sound like the acoustic instruments they're named after but more like the Sid chip, 80's and early 90's video games. They are very good retro sounds for chip music (or chiptune).

The samples were recorded directly from the audio out of the keyboard at 16 bits/ 44.1 kHz.

The Thumbjam version has 26 instruments in total for a size of 79.2 MB, the ones sampled with vibrato have "V" at the end of their names. The free demo set has 2 instruments "Oboe" and "Cowbell V" and the 24 others are in the full version. All are multi-sampled.

This pack is a subset of larger sample set, email me if you want to know the differences between them or have more information.

Installation:

The individual Thumbjam instrument files are included in the larger zip files that you downloaded from our website. You have to unzip the larger file, demo or full version, on your computer first. The demo contains 2 Thumbjam instrument files and the full version 24. These larger zip files also contain this PDF documentation and the zvon_license text file.

Do not unzip the individual Thumbjam instrument files as they have to be imported in Thumbjam as is. Please refer to the Thumbjam documentation for the exact import procedure.

To buyers of the full version: please note that you have to keep the demo instruments installed as they are not duplicated in the full version.

Please visit our iPad and iPhone page for more iOS sounds: http://lesproductionszvon.com/for_iOS.htm

This sample pack can be used royalty-free in any piece of music. The only restriction is that you are not allowed to sell or distribute in any way the presets and samples, even in modified form, without our authorization.

For more details about the license please read the included "zvon_license.txt".
