

Kids Kits demo and paid packs for Caustic 2 by Les Productions Zvon

This expansion pack is a set of samples taken from a recording I made with two young children, a little girl (3 years old) and a little boy (5 years old). They were very happy to sing, talk and make funny noises in the microphone.

I selected 136 unique one-shot samples from this session and further split some of the longer ones so there are 259 samples in total. These also include 13 interesting noise samples.

All the samples are fun as they are but don't hesitate to mangle them. As an example, the stretched versions of 2 samples are included. No external processing was used but some samples, beside the 2 stretched ones, sound like they are processed. These FX were caused by the microphone while recording, like the proximity effect for instance.

The pack has 7 PCMSynth presets. The wav files are also included so they can be used in the BeatBox or in any app that loads wav files. The demo has 2 PCMSynth presets and 41 wav files.

Note that you may delete the demo once you have installed the full pack as it contains all the samples. But if you like the way the demo presets are organized, you may keep them as the samples are organized differently in the full pack.

The table on the next page lists the presets of the full version and gives some info about them.
