

# Zvon Free Tardigrain presets – Volume 1

28 free presets (with samples) for HumbleTUNE granular sampler Tardigrain. These presets feature sounds from various sample packs I released over the years. Note that the new V 1.1 features like the LFOs and note trigger sequencer/arpeggiator are not used in these presets as they were made before its release.

Here's the preset list. They're simply named after the samples used. So no creative, poetic or fancy names here, I did so to keep track of the samples used. List of the source sample packs with their links is in the second column.
